www.NVPsychology.org

NPA is approved by the American Psychological Association to sponsor continuing education for psychologists. NPA maintains responsibility for the program and its content. Approved for: Psychologists, MFTs. Approval pending: LCSW

About the Workshop/Speaker:

About the Workshop:

Parent Child Interaction Therapy (PCIT) is an evidence-based treatment for children 2 to 7 years of age with social, emotional, and behavioral challenges. PCIT is also very effective in increasing attachment between children and their caretakers. This training will review the basic structure and techniques of PCIT. There are two major components, Child Directive Interactions (CDI) and Parent Directed Interactions (PDI). A core feature of the training is the use of in vivo coaching of the caregivers. The training will review assessment protocols, outcome measures and research findings. Due to COVID-19, this workshop will be a live, virtual training. Participants will be able to communicate with the instructor in real-time during the course of instruction.

Learning Objectives:

By the end of this workshop, participants will:

- 1.) Explain the requirements to become a PCIT provider and how to be trained.
- 2.) Identify the target populations for PCIT, with multicultural considerations.
- 3.) Discuss the empirical research supporting PCIT.
- 4.) Explain the primary tenets and structure for the approach.
- 5.) Describe the basic elements and purpose of Child-Directed Interaction.
- 6.) Describe the basic elements and purpose of Parent-Directed Interaction.

About the Speaker:

Dr. Janet Cahill has a Ph.D. in clinical psychology from Temple University. She was trained as a family therapist at the Philadelphia Child Guidance Clinic. Dr. Cahill is a Professor Emerita in the Department of Psychology at Rowan University. She served as chair and was the coordinator of Rowan University's master's program for Licensed Professional Counseling. Her private practice specializes in assessing abused and neglected children and their families. She has developed model protocols in parenting evaluations and recommendations for evidenced based treatments. She has expertise in evaluations and treatment for Factitious Disorder Imposed on Another (aka Munchausen by Proxy).

She is a strong advocate for evidenced base treatment for children and families. She is a certified therapist and Level 1 trainer for Parent Child Interaction therapy (PCIT).

Dr. Cahill has consulted to many human services agencies, including the New Jersey Division of Child Permanency and Protection, the Nevada Division of Child and Family Services, South Carolina CPS, and Colorado CPS and Acenda. An active trainer, she has provided numerous workshops to human service professionals in the community. An overarching goal of her activities is to bring academic expertise and evidence-based practice into community settings.

Audience:

This presentation is intended for psychologists, other licensed mental health providers, and graduate students of psychology. Seating is limited, so register early!
